Kronos: Classical Grand Piano

Artikel info:-

Classical Grand Piano is the sample library for those who are looking for Grand Piano sounds suitable especially for classical but also for jazz music styles. Two great instruments with 6 Velocity Switches to provide a decent dynamic response. And a timbre character which is powerful in the bass, mid and treble range. That makes it perfect to use it for studio recordings and live on stage.

The sample library comes with 24 convenient Program Presets in two soundbanks and provides not only single but also ready-to-use layered instruments. Together with a decent Controller programming for Control Knobs 1-8, S1 and S2 switches and Ribbon for each Program Preset.

Most important Controller assignment is the Ribbon: A slide to the left and the timbre will be a little softer and a slide to the right makes the sound more brilliant. If you want to fix a such a momentary setting for a while you just need to push SW2 Switch. Also you can keep the SW2 Switch in ON Mode (LED lit) and change the timbre character by simply sliding a little more to the left or right on the Ribbon.

With SW1 Switch the sound will be transposed one octave down which is a handy function for 61 and 73 keyboard versions.
